DETAILED ACTION

1. This in reply to amendment filed on December 16, 2005.
2. Claims 3 and 14 are canceled. Claims 1, 2, 4-11, 17 and 19 are amended. One new claim namely dependent claim 21 is added. Thus claims 1-2, 4-13 and 15-21 are examined.
3. There are 5 independent claims namely 1, 4, 11, 17 and 19.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael J. Shea, Registration No. 34, 725 on 12/16/2008.

The application has been amended as follows: In the claims

11. (Currently Amended) Please add the word "The" on the beginning of claim 11 before the word "Code"

Allowable Subject Matter

4. **Claims 1-2, 4-13 and 15-21** are allowed.
5. The following is an examiner's statement of reasons for allowance:
6. **Referring to independent claim 1,**

The art on the record namely the combination of Zeng and Swindle does not disclose the following limitation (previously objected dependent claim 3) which is now incorporated into it.

wherein the EXOR gates comprises a plurality of first EXOR gates each of whose first input is supplied by a respective output of one of the storage elements located in the code-producing series, and whose second input is supplied by the respective output of another storage element located in the code producing series, which is spaced a number of storage elements in the conducting, direction of the series away from the storage element respectively connected with, the first input, which respectively corresponds to a different prime number that is greater than 1

Referring to independent claim 4,

Previous dependent claim 4 has been written in self-standing independent form. The newly added limitation on claim 4 is not disclosed by the reference/s on the record.

Referring to independent claims 11,

The art on the record does not disclose the following limitation (previously objected dependent claim 14) which is now incorporated into it.

wherein, the first and second storage elements corresponding to each of the two or more EXOR gates are spaced apart from each other in the code-producing series by .respective different numbers of storage.. elements, each of the respective different numbers being a prime number

Referring to independent claims 17,

This claim was dependent claim and was objected in the previous office action.

However it has been written in self-standing independent form and contains a limitation such as “**wherein the number of storage elements in the code-producing series is a prime number**” which is not disclosed by the reference/s on the record.

Referring to independent claims 19,

Claim 19 has been amended to incorporate the subject matter of allowable claim 17, “wherein the number of storage elements in the code-producing series is a prime number”, which is not disclosed by the reference/s on the record.

None of the prior art of record taken singularly or in combination teaches a code generator comprising, the above functional limitation, together with the other limitation recited in the respective independent claims 1, 4, 11, 17 and 19, and for this reason, independent claims 1, 4, 11, 17 and 19 are found to be novel and are allowed.

Art Unit: 2432

7. The dependent claims which are dependent on the above **independent claims 1, 4, 11, 17 and 19** being further limiting to the independent claim, definite and enabled by the specification are also allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance."
